SPOTLIGHT: JOY

Joy's road to Our House began when her car was lost in a fire. With limited job options within walking distance, time slowly passed without being in the workforce. A gap in work history compounded the difficulty of finding employment, and Joy found herself homeless. Joy was able to stay with a friend for several months, but together they decided she needed more resources to find independence and financial stability again; Joy has now been in the Shelter since April. It had been several years since Joy worked with a computer, so making a resume was overwhelming to say the least, but our Employment Coaches supported her, and Joy is now participating in the job training program at the Our House Resale Store. Joy is able to take advantage of the bus pass program out of the Career Center, and she has been attending counseling with our Mental Health Manager to help process the changes of the past few months. Joy now feels like she is able to provide the same support to newer residents that she first received!
